

OUR FLOOR BOXES WITH LOCKING OPTIONS

- Minima and 700 series – rectangular and square (except 150x150mm)
- 2000 series
- *Locks do not work effectively with round and 500 series floor boxes because of the hinge mechanism and with very small boxes due to lack of space*

700

WHAT TO CONSIDER WHEN CONSIDERING FITTING A LOCK

- Cableduct will match as closely as possible lock finish/ material to floor box finish – brass, stainless steel or chrome locks (domed head locks are only in chrome)
- Different locks are required depending on depth of floor covering / lid recess – flat or domed
- Be mindful that the lock will not foul internal services or cause problems later
- Locks of the same type use the same key, i.e. “keyed-alike” (unique keys can be ordered but this is likely to affect cost and lead-time)

MINIMA

CONSISTENT AND DISCREET LOCK-POSITIONING

- MINIMA/700 SERIES
 - Lock is positioned in line with the outlet flap & handle
 - Lock is always on the left-hand side
- 2000 SERIES
 - Lock is in the centre outlet flap which reduces number of outlet flaps to 2

2000

LOCK OPTIONS

MINIMA/700 SERIES **STAINLESS STEEL** FLOOR BOX

Lock name	Flat head		Domed head
