OUR VISION AND MISSION

OUR VISION

Our Vision is to share our passion for the art of designing & manufacturing cable management solutions, using our ranges of standard and bespoke floor box and trunking systems; to push the boundaries of how power and data can be elegantly, efficiently & discreetly used in your space, and helping you live, work and play in our ever-changing world.

OUR MISSION

We are committed to tailoring our approach by listening to our clients' individual needs and desires for their projects; Our inquisitive and collaborative nature enables us to bring your vision for your space to life. Regardless of whether we specify a standard or bespoke solution we aim to meet and exceed any project brief by overcoming all hurdles or challenges that site conditions might present.

A WORD FROM OUR MANAGING DIRECTOR

Thank you for taking the time to read this overview of our company. Our goal is to show what is most important to us and everyone that works with us, including notable products and projects.

Cableduct manufactures premium quality floor boxes and cable management solutions. These range from standard products to tailored solutions designed in collaboration with client teams.

Our floor boxes are hand-finished with great care here in the UK and can be any size, shape and finish so they match our customer's design perfectly.

We are a family-owned business that has been manufacturing in the UK for 50 years, something of which we are very proud.

The secret of our longevity and success is undoubtedly our team and we all take great pride in providing the highest quality products and service to our customers.

We have global reach and operate in all sectors in the UK and internationally. Our most prominent sectors include: hospitality, commercial, prime residential, retail, palaces and heritage.

Our customers are at the heart of everything we do and it is their challenges and feedback that drive us. We enjoy working with all customer segments, including but not limited to: architects, designers, consultants, contractors, wholesalers and homeowners.

We believe what sets us apart is our collaborative approach to working with customers and our focus on providing outstanding quality products and service, tailored to our customers' specific needs.

We are tremendously grateful to our customers, our suppliers and our team, all of whom play a vital part in our success. Thank you.

Christopher

Christopher Knollys

THE UK'S LEADING CABLE MANAGEMENT EXPERTS

HEALTH & SAFETY

Health & safety is very important to us. We all work hard to ensure that everyone goes home safe and well every night.

SUSTAINABILITY

We are committed to sustainable development and reducing the impact on the environment from our operations.

Our products are made of steel and brass, giving them a very high recyclable content, which means they can improve a building's environmental performance rating.

We recycle all metal scrap and source packaging that meets the regulatory requirement for at least 30% recyclable content.

OUTSTANDING QUALITY

Cableduct customers are the focus of everything we do.

We are totally committed to providing outstanding quality of service and products.

UK MANUFACTURING

Cableduct products are designed, manufactured and hand-finished in the UK to our own exacting quality standards and tailor-made to our customers' specific requirements.

Manufacturing in the UK gives us complete control over the production process and ensures we meet our standards for excellence.

We remain agile by holding extensive stock of some standard parts to ensure we can respond quickly to customer orders, no matter how bespoke the product you order.

INNOVATION & DESIGN

Innovation is a major driver for us all at Cableduct.

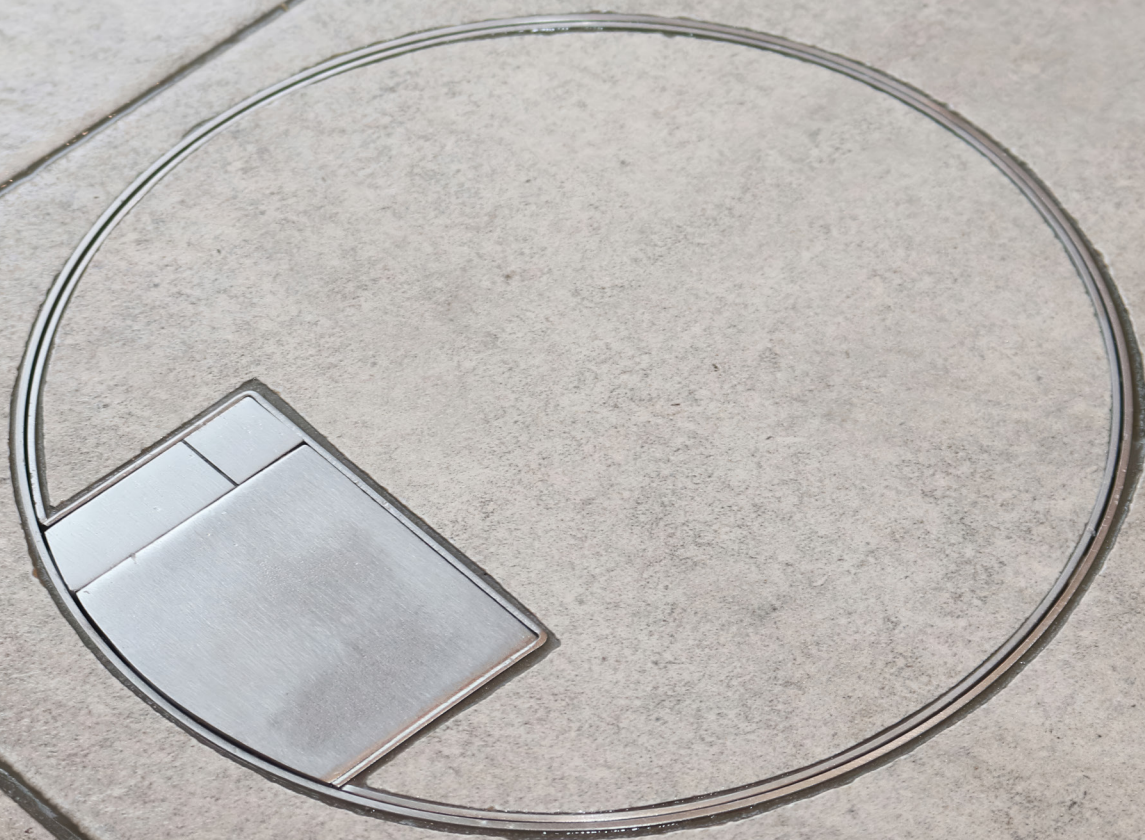

We design and create innovative solutions to resolve your project's challenges and use patents to protect the unique capabilities of our Minima and 2000 series floor boxes.

Through hand-finishing, we then achieve the right balance between engineering excellence and beautiful aesthetics.

FLOOR BOX MINIMA

Contemporary • Unbranded • Solid-cast handle & flaps • Made-to-order • Discreet

MINIMA EXCLUSIVE FEATURES

- Contemporary unbranded design.
- Patented spring-closed handle & flaps keep lid fully flush with floor.
- Two cable exit flaps give more space for leads exiting larger square and rectangular floor boxes.

AS STANDARD

- Rectangular, square or round as standard. Bespoke shapes & sizes available.
- Our solid cast stainless steel or brass cable exit flaps and handles are significantly more robust and durable than rolled sheet metal.
- Hand finished lids and frames show Cableduct's care and attention to detail. This extends further to a personalised made-to-order lid recess.
- Special bronzed and powder-coated finishes available on request.
- Nearly invisible with very little metal showing, which we believe makes this the most discreet floor box on the market.

FLOOR BOX 700 SERIES

Classic • With CD logo • Solid-cast handle & flap • Made-to-order • Discreet

700 SERIES EXCLUSIVE FEATURES

- Classic design with discreet CD logo.
- Elegant look with smooth rounded edges to flap and handle.

AS STANDARD

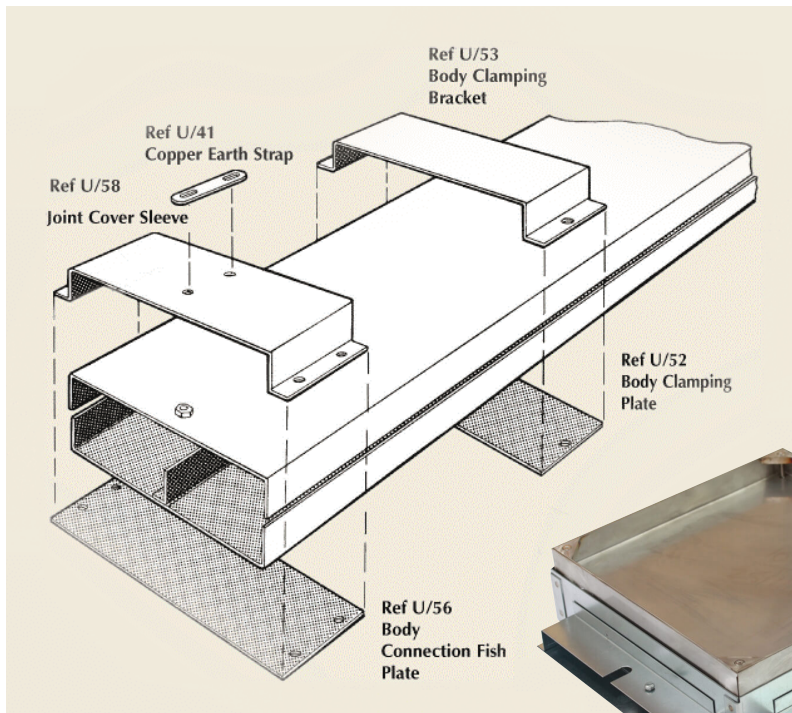

- Rectangular, square or round as standard. Bespoke shapes & sizes available.
- Our solid cast stainless steel or brass cable exit flaps and handles are significantly more robust and durable than rolled sheet metal.
- Hand finished lids and frames show Cableduct's care and attention to detail. This extends further to a personalised made-to-order lid recess.
- Special bronzed and powder-coated finishes available on request.
- Nearly invisible with very little metal showing, which we believe makes this the most discreet floor box on the market.

TRUNKING

UNDERFLOOR IN SCREED

- In screed trunking is buried in the screed during installation to provide a secure, concealed and unobtrusive method of routing electrical and data cables throughout a building.
- Our Minima and 700 series floor boxes integrate seamlessly with our in screed trunking using spigots.
- Additionally, our junction boxes provide access to services and wiring for post-installation maintenance and enable changes in direction of trunking and wiring.

See trunking overview brochure for more product details

OTHER TRUNKING

FLUSH FLOOR

Designed for use in screed floors and to sit flush with the surrounding screed. This provides the best flexibility for moving floor boxes up and down the trunking run, as required.

SURFACE (P.O.A. only)

Surface trunking is installed directly onto a wall, floor, or ceiling to contain unsightly wires and to prevent trip hazards. It is fully customisable and available in any size.

PERIMETER & BENCH

Robust, durable and stylish skirting and dado perimeter trunking for low or mid-level above the floor. Available in a wide variety of sizes, profiles and finishes. Bench trunking is a low-profile solution for worktops.

PEDESTAL BOXES

Pedestal boxes are a neat and unobtrusive choice for desk and worktops in office environments, education establishments and healthcare buildings. Available in a wide variety of sizes, profiles and finishes.

TAILORED SOLUTIONS

Cableduct floor boxes and containment solutions can be bespoke designed to meet your exact project specifications.

Whatever size and shape of floor box you need, we can design, manufacture, and supply the perfect solution for you.

Many of our bespoke floor boxes and containment units use the features of our standard products tailored to meet your requirements. This enables us to offer a myriad of solutions to meet almost any of your cable management needs.

YOU DESIGN

What you need your floor box to do and what you want it to look like are paramount for us.

Cableduct take into consideration project details, site conditions and your design intent for the project.

Developing a tailored solution for the interior and exterior of your desired floor box/trunking solution is a consultative process; we're with you every step of the way.

WE BRING TO LIFE

We create bespoke floor box/trunking solutions tailored to suit your specific project requirements.

Our skilled team transform the most intricate floor box design ideas into a high-functioning and aesthetically-attractive reality (i.e. ideas to reality).

We work with each individual client to help realise their vision. We can create any-sized floor box and many bespoke shapes, including parallelograms, triangles and hexagons.

We can also often match your floor box's design with your floor covering and the finish with other accessories in the room for a seamless design.

MARKETS

At Cableduct, we manufacture our floor boxes and cable management products in the UK and send them to our customers all over the world. Our products are used in a broad range of applications, helping to provide discreet, safe and easy access to power and data sockets for the top tier of many market sectors.

CASE STUDIES

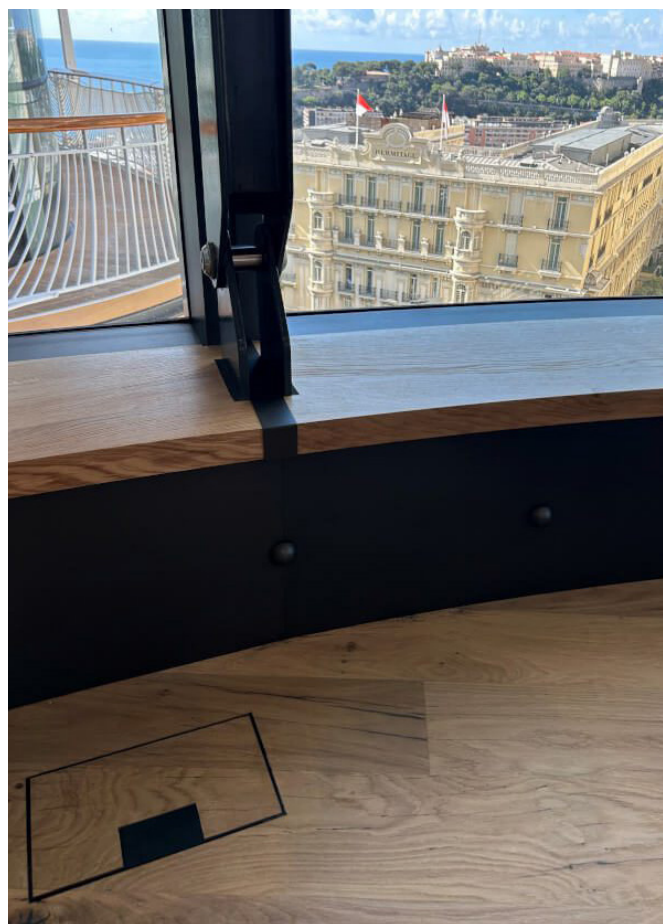

Monte Carlo

BACKGROUND

- A high specification office fit-out in one of the most coveted addresses in Monte Carlo.
- Electrical services had to be run to all areas of the office, including directors' offices, meeting rooms and gym.
- The floor box finishes needed to match the final floor colours and the lavish, pure and modern style associated with this super prime Monaco site.

SOLUTION

- Cableduct supplied bespoke contemporary-style Minima floor boxes with powder-coated black lids.
- These were unobtrusive and discreet, while enabling power plugs and data points to be easily accessible in all spaces and open plan areas.

Chelsea Barracks

BACKGROUND

- A prestigious Chelsea Barracks residential development in London.
- Inspired by the Georgian squares of Belgravia.
- Pinnacle of modern design and living space.

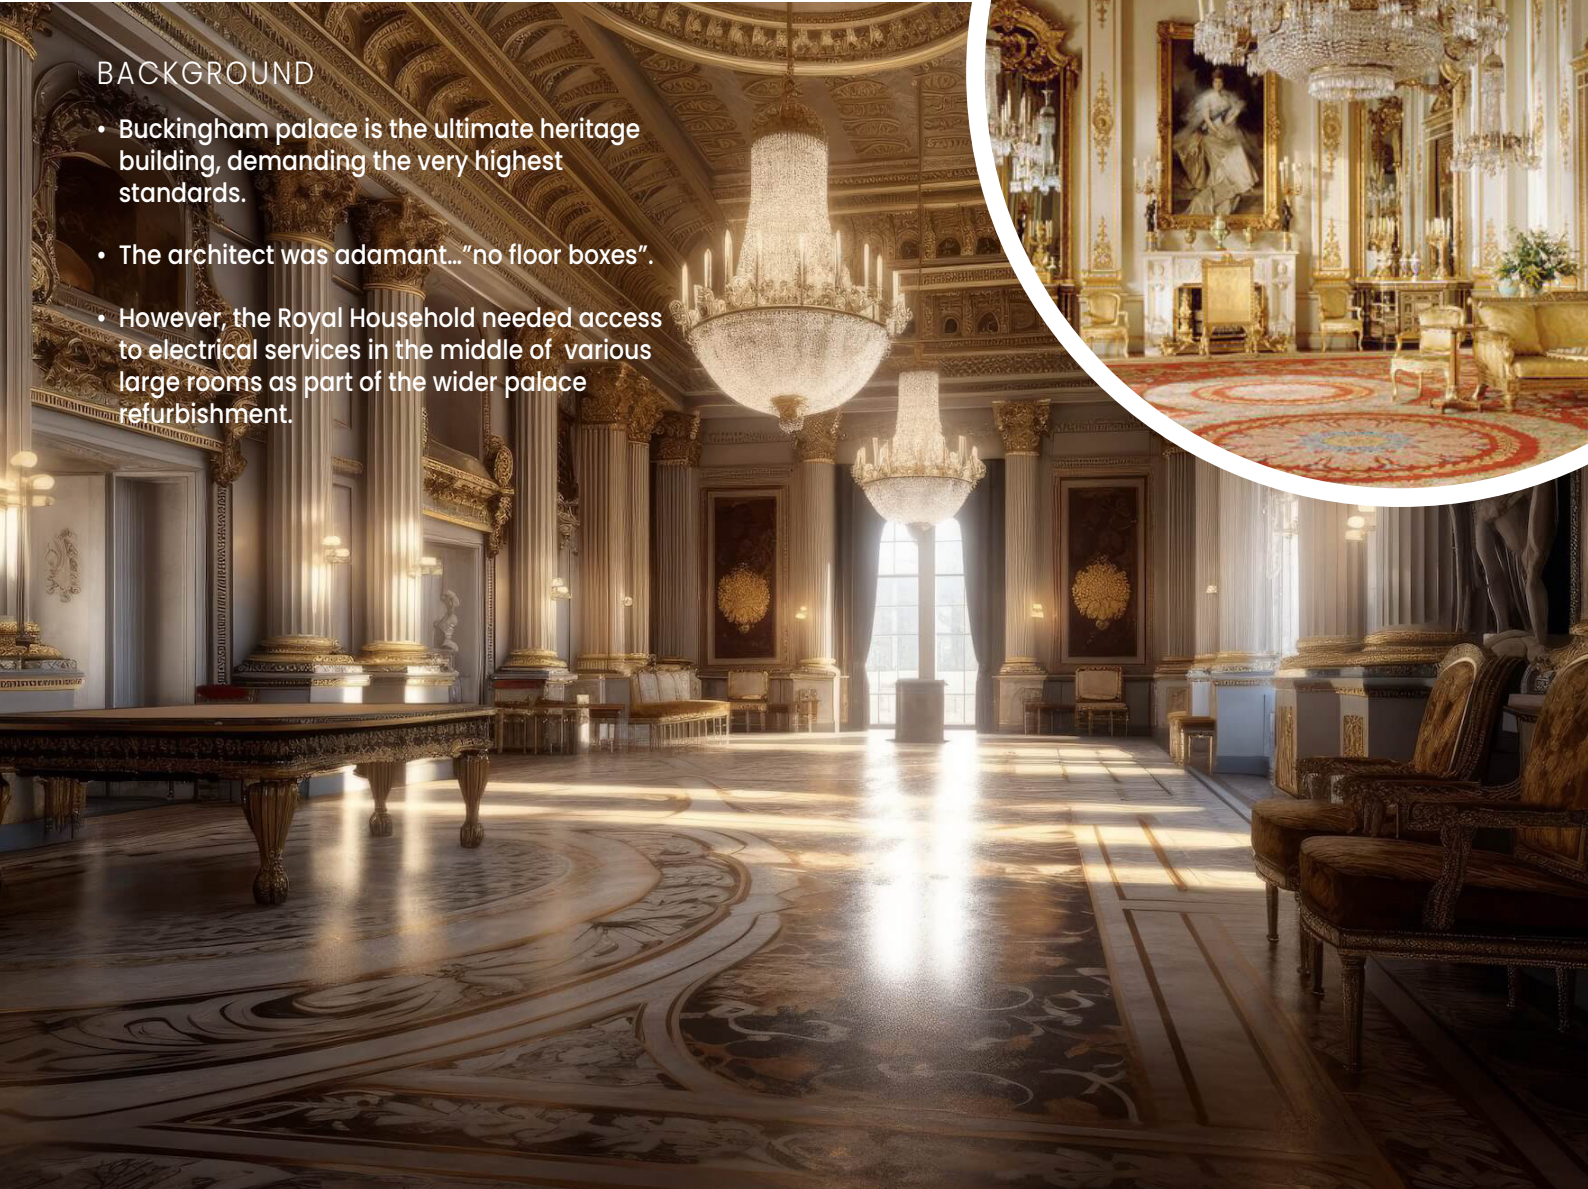

SOLUTION

- Our contemporary Minima floor boxes matched the brief exactly.
- Special finishes included jordan bronze for a subtle but powerful impact in keeping with the overall interior design.

Buckingham Palace

BACKGROUND

- Buckingham palace is the ultimate heritage building, demanding the very highest standards.
- The architect was adamant..."no floor boxes".
- However, the Royal Household needed access to electrical services in the middle of various large rooms as part of the wider palace refurbishment.

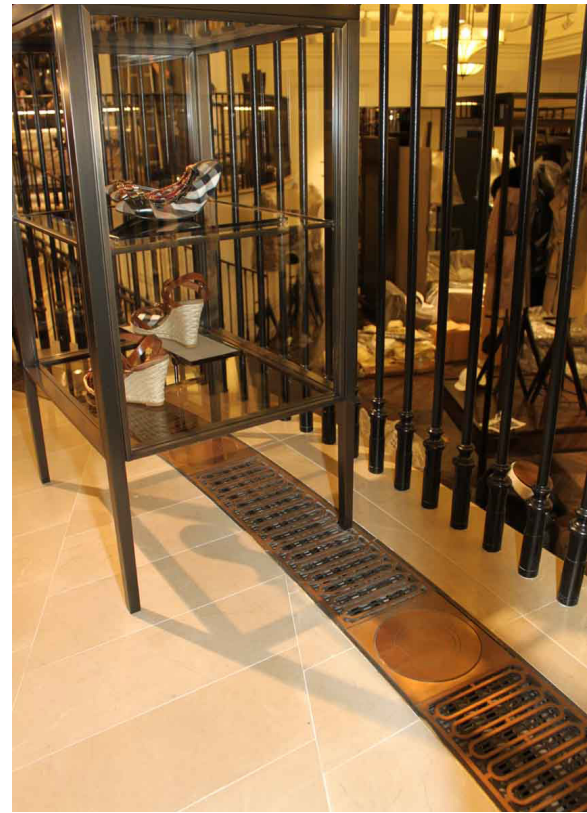

SOLUTION

- Cableduct's classic 700 series floor box was ideal for the palace and its beautiful interior.
- Floor boxes were supplied in polished brass with a brass carpet trim, with a tailored lid recess to suit the 20mm thick carpet being used.
- This design has subsequently been used more widely in this and other royal residences.

Burberry

BACKGROUND

- The architects chose the Burberry Flagship store to launch their new digital displays, making them stand out from other luxury retailers.
- Each area of the store was fitted with varying exceptional floor finishes.
- Cableduct's bespoke floor box designs had to enable the required power and data to be accessible at the displays whilst blending seamlessly with the beautiful floor finishes.

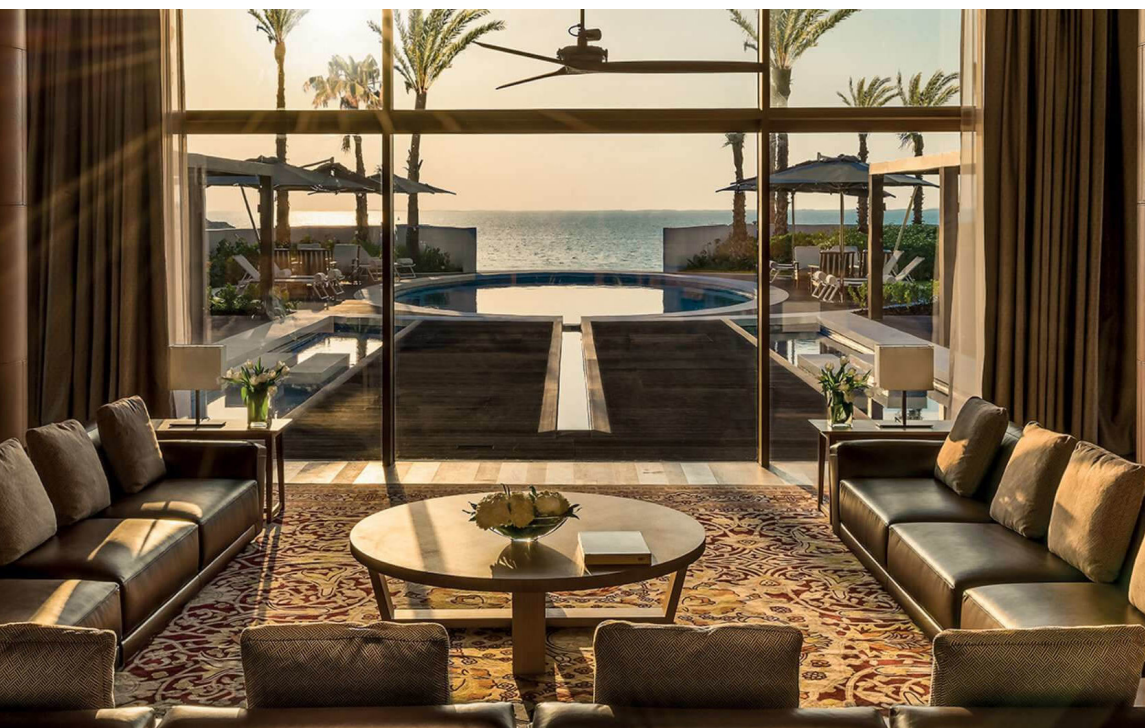

SOLUTION

- Eleven unique designs were brought to life by Cableduct, with bespoke outlet flaps and floor box designs to fit each individual floor finish and construction.
- The floor boxes had to fit in with the parquet pattern whilst avoiding the steel beams making up the suspended floor system.
- These designs were rolled out to all new Burberry stores.

BACKGROUND

- Part of the residential development in the prestigious Bulgari resort on Jumeirah Bay island, Dubai.
- A discerning client wanted the most discreet floor box available so as to be “almost invisible” when their beautiful floor finish was fitted into the lid.
- Power, USB and AV sockets were all required.
- The design required an unbranded, fully-flush floor box with lids, frames and flaps & handles with the same finish as the other accessories.

SOLUTION

- Cableduct supplied contemporary unbranded Minima floor boxes.
- Fully-flush and “almost invisible” as a result of patented spring-closed outlet flap & handle, recessed lid for the final floor finish and the least amount of visible metal of any floor box.
