TAILORED SOLUTIONS

Bring inspiring ideas to life

CABLEDUCT LIMITED

‘Nearly invisible’, but what little you see...*counts*

Cableduct Minima and 700 series floor boxes can be tailored to meet your exact project specification.

Whatever size, finish and shape of floor box you need, we can manufacture the perfect solution for you.

Our tailored floor boxes often start with our standard products, which can then be tailored to meet your needs.

DISCREET LIDS

Make your floor box 'nearly invisible' within your floor covering

Made-to-order lid recess

- Customise your lid recess depth to accommodate the thickness of your floor covering (incl. adhesive)
- 'Discreet means discreet': floor box is scarcely visible once floor covering has been fitted into the lid – barely 10% observable metal

700 series

700 series

Fit floor coverings into your customised lid recess

- Blend your floor box into your floor covering and design to make the floor box as unobtrusive as possible
- Lids are hand-finished, with lid recess depth customisable from 3mm to 30mm

700 series

700 series

- All floor coverings can be accommodated *(*Subject to site conditions)*

Shallow carpet/vinyl (1mm-6mm deep)

Carpet (3mm-25mm deep)

Timber/Engineered wood (7mm-25mm deep)

Porcelain/stone tiles (9mm-25mm)

Poured finish (screed, terrazzo, resin, microcement)

Flat lid (metal top; no lid recess)

ELEGANT FINISHES

What little you see...*counts*

Attention to detail, for exceptional finishes

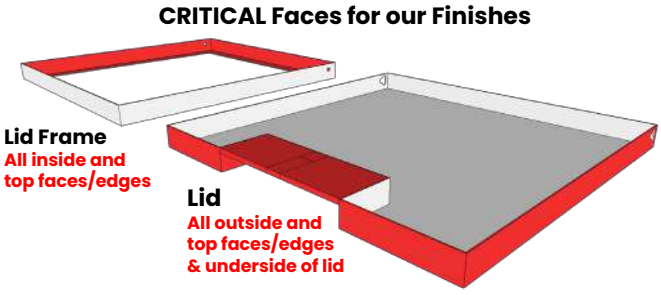
- Tailor the finish of lids, handles & flaps to coordinate with your internal décor and floor covering
- Cableduct floor boxes have as little as 10% visible metal, keeping your finished floor the focal point in the room
- Handles & flaps are discreet and finished by hand
- They complement warm metallic accents or add contrast and depth to your overall design

Minima handle & flaps

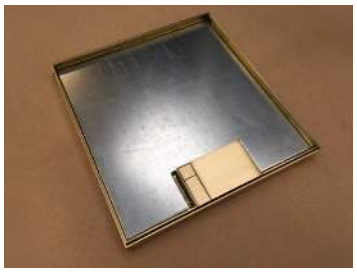
700 series handle & flap

Perfect balance of design and engineering

- Our finishes are applied to critical faces on the lid, lid frame and handles & flaps
- This shows off the finish in its best light while enabling the floor box to operate perfectly for its full lifetime



700 series

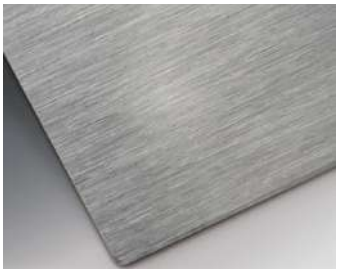


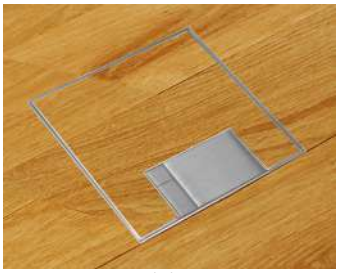
Minima

Established, classic, solid metal finishes

- Satin Brass and Satin Stainless Steel offer timeless elegance, as standard finishes
- Modern yet classic for a blend of traditional design elements with contemporary aesthetics
- Durable and with a lightly brushed satin textured finish to balance simplicity and sophistication perfectly

Satin Stainless Steel





Minima

Satin Brass

Minima

Mirror-polishing for an instantly refined impact

- Lustrous and flawless finish that has a dramatic impact on any design
- Mirror-polished stainless steel is a modern finish that complements perfectly a chrome or nickel-based design palette
- Mirror-polished brass creates a rich, opulent feel and is ideal for co-ordinating with gold fixtures
- Best sited in low-traffic areas

Mirror-Polished Stainless Steel

ELEGANT FINISHES (cont.)

New design-led colours inspired by customer feedback bring more choice to your interior design

- Expanded range of powder-coat colours for our floor box lids
- Either, complement your chosen design elements with subtle pops of colour
- Or, make your Cableduct floor box blend in even more by co-ordinating its colour with the floor covering pattern

700 series

COLOURS

Design-led powder-coat finishes

Black
(RAL9005)

- Adds versatility and depth to a scheme as it can be paired with almost anything or when used with other black elements makes a space feel richer and more layered.
- Provides a strong contrast to softer palettes and enhances other colours.

Steel Blue Grey
(715)

- From modern rustic styles to luxurious settings, the natural harmony between blue & grey exudes a sense of calmness and serenity.
- When used with wooden accents and cream or beige tones, it can help bring warmth to the fore in any environment.

Pearl Mouse Grey
(RAL7048)

- A sophisticated neutral shade ideal for creating a chic, calm or modern aesthetic across a variety of room styles.
- A popular choice for a Scandinavian-inspired setting.

Cream
(RAL9001)

- A prerequisite for a wide spectrum of design schemes to achieve almost any style outcome from cosy and inviting to dramatic and impactful through the use of darker hues or metallic accents.
- Ideal for use with earthy tones like sage green or sky blue for a calming and refreshing feel.

Signal White
(RAL9003)

- An almost unique ability to refresh and rejuvenate by making a room feel brighter and more spacious and serene.
- The perfect neutral canvas for a variety of styles.

TAILORED SHAPES
Any size, any shape, any design

Any size & shape

- From made-to-order sizes to suit the width of your timber planks to bespoke shapes like parallelograms and octagons
- Fully integrate your floor box shape into your floor pattern, i.e. parquet, floor tiles, grilles to make your floor box as inconspicuous as possible
- Innovative solutions to fulfil even the most imaginative schemes
